

## Open Position: IT Analyst - Full Time

### Description

We are seeking a highly motivated individual to evaluate, implement and support information technology systems. Strong analytical skills are a must. The applicant must have a strong desire to learn, and willingness to apply his or her technical expertise where needed.

This position involves supporting existing infrastructure as well as developing and deploying new solutions. The IT analyst must monitor trends in the industry to help create efficient and cost-effective solutions. Furthermore, the IT analyst will provide support and assistance to the end-users of these information systems.

Candidates should have a Bachelor's degree in Information Technology or a related field. Candidates must have very strong technical abilities, excellent computer skills, and must be able to learn new technologies rapidly.

### Required Experience

- Linux server
- Familiarity with web-based technologies
- A programming language, preferably in the .NET family
- Experience with computer hardware (assembly, troubleshooting)

### About Language Intelligence
