

# Finally, An Easier Way to Review Translated Content

## intellireview®

Meet intellireview® — the collaborative online document review platform built specifically for translation projects. No downloads, installations or help desk calls required. In other words, your life just got a little easier.

### Let's Talk

---

### You Stay in Control

intellireview® automatically tracks all changes, comments and activity in your document, so you never miss a thing. No more untracked edits, accidental rejections or version issues. We'll handle the audit trail, so you can focus on reviewing the document. It's your content after all, shouldn't you be in control?

### Save Time with Simpler Reviews

With multiple view options, you can easily switch the entire document from target to source language with the click of a button. Since intellireview® automatically preserves formatting and display design, you can review and approve changes in your native language and switch back to review the translated layout with ease.

### More Security, Less Clutter

Simply log in online for fast and secure access to all your documents in one easy place. No IT installations, software license limitations or file transfers. With intellireview®, you see all the documents you need to, none of the documents you don't. Plus, you'll have instant access to change reports whenever you need them.
